Appendix

SOURCES FOR THE RIAU ISLAND MAPS

Hans Hortig and Karoline Kostka

The maps presented in this book are based on site-specific field studies, official datasets and online resources compiled by Karoline Kostka and Hans Hortig between July 2019 and April 2020. They are uniquely produced for this publication.

The authors gathered additional insights into the Singapore-Johor-Riau region during their work at the Chair of Architecture of Territory at the Singapore ETH-Centre, Future Cities Laboratory (FCL), from 2013 to 2015. Further discussions and feedback from the editors Francis Hutchinson and Siwage Dharma Negara helped to shape the final version of the map sections.

The most significant sources for creating a base map in all sections are:

- Open Street Map (OSM), Open source geo-referenced information, data retrieved in the period of July 2019 to April 2020.
- Natural Earth, free vector and raster map data, <https://www.naturalearthdata.com/downloads/> (accessed December 2019).
- Badan Informasi Geospasial (BIG), Indonesia Geospasial Portal, <http://portal.ina-sdi.or.id> (accessed between July 2019 and February 2020).

Additional information for the specific map sections are derived from the following sources:

Introduction
