Population Policies and Programmes in Singapore
The Institute of Southeast Asian Studies (ISEAS) was established as an autonomous organization in 1968. It is a regional centre dedicated to the study of socio-political, security and economic trends and developments in Southeast Asia and its wider geostrategic and economic environment.

The Institute’s research programmes are the Regional Economic Studies (RES, including ASEAN and APEC), Regional Strategic and Political Studies (RSPS), and Regional Social and Cultural Studies (RSCS).

ISEAS Publications, an established academic press, has issued more than 1,000 books and journals. It is the largest scholarly publisher of research about Southeast Asia from within the region. ISEAS Publications works with many other academic and trade publishers and distributors to disseminate important research and analyses from and about Southeast Asia to the rest of the world.

PART ONE: ANTINATALIST PERIOD 1

1 BACKGROUND 3

2 A PRIVATE PROGRAMME 7
   Formation of the FPA 7
   Objects 8
   Organization 9
   Clinics, Acceptors, and Attendances 13
   Characteristics of New Acceptors 16
   Targets and Achievements 20
   The Re-establishment of the FPA 21

3 THE GOVERNMENT PROGRAMME 24
   Formation of the SFPPB 24
   Objectives 25
   Organization 26
   Clinical Services 31
   Characteristics of New Acceptors 32
   Targets and Achievements 35
4 INDUCED ABORTION
  Move towards Legal Abortion
  The Abortion Debate
  Legal Abortion
  Abortion on Demand
  Characteristics of Abortees
  Incidence of Abortion

5 VOLUNTARY STERILIZATION
  Move towards Legal Sterilization
  Legal Sterilization
  Further Liberalization of the Sterilization Laws
  Sterilization on Demand
  Characteristics of Sterilized Persons
  Incidence of Sterilization

6 INCENTIVES AND DISINCENTIVES
  Overview
  Maternity Leave
  Accouchement Fee
  Personal Income Tax
  Public Housing
  Primary School Registration
  Work Permit

7 KNOWLEDGE, ATTITUDES, AND PRACTICE
  Family Planning
  Abortion
  Sterilization
  Government Population Policies

8 RAPID FERTILITY DECLINE
  Long-term General Trends
  Effect of the Changing Age Composition
  Changes by Age
  Changes among Married Women
  Changes by Parity
  Changes by Race
  Causes of Fertility Changes
  Future Trends
PART TWO: PRONATALIST PERIOD 143

9 UPLIFTING FERTILITY OF BETTER-EDUCATED WOMEN 145
   Introduction 145
   Graduate Marriage Matchmaking 146
   Enhanced Child Relief 147
   Primary School Registration 148
   Sterilization Cash Incentives 153
   Hospital Accouchement Fees 155
   Conclusion 156

10 RELAXING OLD ANTINATALIST POLICIES 159
   Need for Change 159
   Abortion 162
   Sterilization 163
   Public Housing 164
   Use of Medisave 164
   Third Child Maternity Leave 165
   Primary School Registration 167
   Personal Income Tax 167

11 INTRODUCING LIMITED PRONATALIST POLICIES 171
   Baby Bonus 171
   Public Sector Leave 174
   Public Sector Flexible Work 174
   Childcare Subsidy 175
   Public Housing 176
   Special Tax Rebates 177
   Conclusion 179

12 STRENGTHENING OLD PRONATALIST INCENTIVES 181
   Need for Further Change 181
   Use of Medisave 183
   Extra Paid Maternity Leave 184
   CPF Top-Up Grant for HDB Apartments 186
   Extending Baby Bonus to First and Fourth Child 188
   Increased Infant Care Subsidy 190
   Parenthood Tax Relief 191
   Working Mother’s Child Relief 192

Preface

Population Policies and Programmes in Singapore is a vastly expanded version of my earlier book published some twenty-five years ago by Oxford University Press under the old title of Population Control for Zero Growth in Singapore. This revised edition of the book has been divided into two distinct sections — Part One: Antinatalist Period and Part Two: Pronatalist Period. The former deals with the period when the main concern was the need to lower the high and above-replacement fertility in the early years, and the latter covers the more recent period when the focus of attention was centred on preventing fertility from continuing to move forward at a level too low below-replacement fertility. The chapters included in Part One have been reproduced, with some revisions, from my earlier book, while Part Two contains the new chapters and appendices.

The enlarged book has therefore been structured in such a manner as to present a comprehensive account of the initiatives undertaken by the government to influence the course of fertility, and hence the rate of population growth, in the island state of Singapore during the last four decades or so. The book may be viewed as a case study of the public policy of a country in the area of population with regard to fertility and population growth. Hopefully, the book will enable the people of Singapore to comprehend the fundamental population issue of the day and to recognize the rather low below-replacement fertility, coupled with its adverse consequences, that will persist during their whole lifetime. More specifically, the book will be useful to married couples with children or planning to have babies since it constitutes a convenient source of detailed information on all the existing pronatalist incentives, financial or otherwise, that they are entitled to claim.

In the preparation of the two editions of the book, I was fortunate to receive the valuable assistance of many organizations and individuals.
My thanks go to the Government Statistics Department, the then Family Planning and Population Board, and the Family Planning Association for supplying me with the statistical data and other relevant materials. My research has been enormously facilitated by the conducive facilities offered at the London School of Economics Library, the National University of Singapore Library, and the Institute of Southeast Asian Studies. I wish to thank Mr K. Kesavapany, Director of ISEAS, for his generous hospitality and for providing me with a research assistant, Mr Benjamin Loh, while I was deeply immersed in writing the latest edition of the book. My thanks are also due to Mrs Triena Ong, Managing Editor of ISEAS Publications Unit, for her tireless effort in bringing out this book so expeditiously. Finally, I am indebted to my wife, Cheng Siok Hwa, for reading and commenting on the manuscripts of both editions. Needless to say, any opinions and shortcomings in the book are entirely my own.
