HARNESSING PRODUCTION NETWORKS

The **Institute of Southeast Asian Studies (ISEAS)** was established as an autonomous organization in 1968. It is a regional centre dedicated to the study of socio-political, security and economic trends and developments in Southeast Asia and its wider geostrategic and economic environment.

The Institute's research programmes are the Regional Economic Studies (RES, including ASEAN and APEC), Regional Strategic and Political Studies (RSPS), and Regional Social and Cultural Studies (RSCS).

ISEAS Publications, an established academic press, has issued more than 2,000 books and journals. It is the largest scholarly publisher of research about Southeast Asia from within the region. ISEAS Publications works with many other academic and trade publishers and distributors to disseminate important research and analyses from and about Southeast Asia to the rest of the world.

Acknowledgements

This book is a non-technical collection of my past research studies pertaining to the impacts of and policy implications on rising production networks which have emerged as a key production platform in the world of globalization. It has enormously benefitted from the intuitive insights and discussions with Associate Professors Shandre M. Thangavelu and Jung Hur, both of whom inspired me to pursue in-depth research on this subject. I would also like to confer my special thanks to the Director of ISEAS, Ambassador K. Kesavapany; former Deputy Director of ISEAS, Dr Chin Kin Wah; Managing Editor of ISEAS Publications Unit, Mrs Triena Ong, and my colleagues at the Publications Unit, for their excellent support and suggestions.

Lastly, the completion of this book would not have been possible without the support and encouragement from my parents and my wife, Miyuki Chan. To them, I hereby devote this book.
