FISCAL SYSTEMS AND PRACTICES IN ASEAN

The **Institute of Southeast Asian Studies (ISEAS)** was established as an autonomous organization in 1968. It is a regional research centre for scholars and other specialists concerned with modern Southeast Asia, particularly the many-faceted problems of stability and security, economic development, and political and social change.

The Institute is governed by a twenty-two-member Board of Trustees comprising nominees from the Singapore Government, the National University of Singapore, the various Chambers of Commerce, and professional and civic organizations. A ten-man Executive Committee oversees day-to-day operations; it is chaired by the Director, the Institute's chief academic and administrative officer.

The **ASEAN Economic Research Unit** is an integral part of the Institute, coming under the overall supervision of the Director who is also the Chairman of its Management Committee. The Unit was formed in 1979 in response to the need to deepen understanding of economic change and political developments in ASEAN. The day-to-day operations of the Unit are the responsibility of the Co-ordinator. A Regional Advisory Committee, consisting of a senior economist from each of the ASEAN countries, guides the work of the Unit.

6.3	Steps in Budgetary Control in Thailand	191

Acknowledgements

This volume is based on the research findings of a project on Fiscal Systems of ASEAN Member Countries: A Comparative Study, which began in January 1985. It is with deep appreciation that I acknowledge the assistance of the institutions and individuals who have made this publication possible.

My foremost debt is to the Institute of Southeast Asian Studies in Singapore, and its Director, Professor Kernial S. Sandhu, who provided support and encouragement throughout the duration of the project. Special thanks are also due to the Konrad Adenaur Foundation for their financial support for the project. I am also grateful to the Publications Unit of ISEAS for their editorial efforts.

I would also like to thank Agustin Kintanar, Jr., former Head of the ASEAN Economic Research Unit, who provided leadership and help during the initial stages of the project. I am also grateful to Tan Loong-Hoe, the present Head of the Unit, for his support and encouragement.

It has been a pleasure working with the other contributors to this volume — Anwar Nasution, Agustin Kintanar, Jr., Piboon Limprapat and Pongpanu Svetarundra — and I would like to record my appreciation for their dedication.

Finally, I would like to thank Bhanoji Rao and Antonio Strazzullo for their comments on various papers in this volume.

November 1989
