

Index

- basic innovations, 21, 23, 156–157, 317
- city size classes, 89, 129
- decentralization
 - international, 17–20, 23
 - inter-regional, 17–20, 23, 81, 91–92, 255–259
 - intra-regional, 17–20, 133, 255–259
- decentralization policy
 - administrative functions, 185, 196, 200, 207
 - concepts and organization, 177–201
 - goals and instruments, 177–201
 - industry, 178–181, 187–188, 191–193
 - national scale, 178–184, 193–196
 - research and development, 212–213
 - research institutes, 263–310
 - rural areas, 188–191, 196, 198
 - Seoul, 178–181, 184–188, 196–197
 - universities, 263–310
- decentralized concentration, 134
- dependencia theories, 26
- direct foreign investment, 50, 57
- East and Southeast Asia
 - economic policy, 7–9
 - industrialization, 2–5
 - industrialization strategies, 6–7, 10
 - spatial disparities, 11
- economic policy, 7–9, 50–51, 54, 58, 208
- evaluation of decentralization strategies
 - growth poles, 183, 185, 195, 207–213, 216, 226–259
 - polycentric metropolitan region, 203–207, 215–216
 - research institutes, 283–288, 305–310
 - rural areas, 213–214, 217
 - universities, 283–288, 305–310
- export diversification, 54–57
- Five-Year Plan for Economic Development, 38, 41, 43, 48, 51
- gross national product
 - per capita, 2–3, 38

- growth pole strategy, 226–227, 229–230, 255–259, 262–275, 320–321
- industrial centers, 92–98
- industrial estates, 178, 192, 198, 208–212, 214, 309
- industrial relocation, 203–205
- industrial restructuring, 43–50, 58, 81–82, 157, 266, 306, 317–318
- industrialization, 2–5, 43–50
 - heavy industry, 48–50
 - human-capital-intensive industry, 48–50
 - light industry, 43–48
- local campuses of Seoul universities
 - development, 291–293
 - disadvantages, 300–305
 - employees, 292, 294
 - spatial linkages, 298–300
 - students, 294–299
- locational quotients, 91–93, 96–97
- material living conditions, 141–154
- metropolitan region, 178–181, 184–188, 196–197, 203–207, 215–216
- migration
 - causes, 108–109
 - inter-regional, 106, 107
 - intra-regional, 106
 - rural-urban, 110–114
- personal income distribution, 135–140
 - causes, 137–140
 - international comparison, 136
- polarization theories, 26–27
- polarization reversal hypothesis, 27–29, 126, 156–158, 217, 316
- population
 - density, 100, 104–105
 - development, 100–101
 - regional distribution, 101–104
 - urban, 115, 117–118
- poverty, 140–141, 143–144
- product life cycle hypothesis, 15–20, 59, 156–157, 239, 242, 259, 316–317, 319, 320
- relief poles, 182, 184, 203, 205, 207, 215
- rank-size rule, 127–129
- regional average wages, 148–150, 155
- regional economic multiplier effects, 230, 258
- regional income
 - definition, 145–146
 - development, 147–148, 154
- regional industrial structure
 - causative factors, 66–69, 74–75
 - city-size classes, 89–92
 - degree of spatial concentration, 75–81
 - development, 61–65, 70–73, 81–82
 - typification of industrial regions, 82–88, 92–98
- regional infrastructure, 151–156
- regional growth cycles, 24, 217, 248
- regional policy
 - concepts, 177–199
 - evaluation, 202–225, 255–259, 318
 - recommendations, 308–310, 319–322
 - theory, 26–27, 29, 31, 217
- regional transformation process
 - industry, 98–100
 - population, 133–134
 - socio-economy, 135–156
 - urban system, 134
- rural areas, 110–114, 188–191, 196, 198, 213–214, 217
- rural households
 - debts, 142, 155
 - expenditure, 144–145
 - income, 141–143, 155
- research and development investment, 265–266
- research and development institutes
 - development, 266
 - employees, 268–269
 - regional distribution, 266–269

- Seamaul-Undong, 189, 191, 213–214
 small and medium-size enterprises, 51–54
 shift share analysis, 65
- Taedok Science Town, 212–213, 216, 264–265, 273–292
 employees, 281–291
 locational advantages, 277
 locational decision, 275–277
 locational disadvantages, 277–280
 regional linkages, 280–281, 288–290
- Taejon
 income spending, 255–256
 industrial structure, 233–236
 innovational orientation, 251
 linkages, 245, 248–250
 locational advantages, 242
 locational disadvantages, 243–245
 mobility of employees, 253–255
 socio-economic development, 229
 technological progress, 14–15
 theory of long waves, 20–25, 157–158, 316–318
