DESIGNING FOR CONSENSUS

The **Institute of Southeast Asian Studies** was established as an autonomous organization in May 1968. It is a regional research centre for scholars and other specialists concerned with modern Southeast Asia, particularly the multi-faceted problems of stability and security, economic development, and political and social change.

The Institute is governed by a twenty-two-member Board of Trustees comprising nominees from the Singapore Government, the National University of Singapore, the various Chambers of Commerce, and professional and civic organizations. A ten-man Executive Committee oversees day-to-day operations; it is chaired by the Director, the Institute's chief academic and administrative officer.

The **ASEAN Economic Research Unit** is an integral part of the Institute, coming under the overall supervision of the Director who is also the Chairman of its Management Committee. The Unit was formed in 1979 in response to the need to deepen understanding of economic change and political developments in ASEAN. The day-to-day operations of the Unit are the responsibility of the Co-ordinator. A Regional Advisory Committee, consisting of a senior economist from each of the ASEAN countries, guides the work of the Unit.

Cataloguing in Publication Data

Talisayon, Serafin D.

Designing for consensus : the ASEAN grid.

1. Energy industries—ASEAN countries.
2. Electric power systems—ASEAN countries.
3. Electric power production—ASEAN countries.

I. Institute of Southeast Asian Studies (Singapore). ASEAN Economic Research Unit.

II. Title.

HD9502 A92T14 1989 sls89-44780

ISBN 981-3035-06-4 (soft cover)

ISBN 981-3035-07-2 (hard cover)

Typeset by The Fototype Business

Contents

<i>List of Tables</i>	ix
<i>List of Figures</i>	xi
<i>Acknowledgements</i>	xiii
I. Introduction	1
II. Scope of the Study	4
1. Review of the Literature	4
2. Aim and Scope of the Study	7
III. Basic Concepts and Assumptions	12
1. Electricity Grid	12
2. Variations in Load	12
3. Variations in Power Plant Characteristics	16
4. Interconnection and Electricity Trade	18
5. Characteristics of a Grid	23

6. A Regional Interconnection/Grid as a Socio-Technical System	25
7. Stages of Feasibility	27
IV. Experiences in Other Regions	33
1. Existing Interconnections	33
2. Studies/Plans for Interconnection in Other Regions	34
3. NORDEL	35
V. History of ASEAN Energy Co-operation	41
1. Initial Impetus for ASEAN Energy Co-operation	41
2. Proliferation of ASEAN Energy Bodies	42
3. Recent Developments	47
4. History of Electricity Co-operation	50
5. Thailand-Laos Electricity Co-operation	56
VI. The Concept of an ASEAN Grid	59
1. Interconnection versus Grid	59
2. The ASEAN Power Interconnection Concept	60
VII. ASEAN Power Industries	64
1. Energy Resource Base	64
2. Lifetimes of Fossil Fuel Reserves	65
3. Technical Characteristics of ASEAN National Grids	69
4. Organizational Structures and Policy Processes in ASEAN Power Utilities	73
5. Long-Term Overview of ASEAN Power Industries	78
VIII. External Factors Affecting the Feasibility of an ASEAN Grid	81
1. Energy Prices	85
2. Technological Developments	85
2.1 High-Voltage Transmission Technology	85
2.2 Dispersed Storage and Generation	85
2.3 Small-Scale Energy Technologies	87
3. Environmental Consequences of Power Production	89
3.1 Carbon Dioxide (CO ₂) Production from Fossil Fuels	89

3.2 Storage of Nuclear Wastes	90
3.3 Hydroelectric Power	91
4. Geography	93
5. Summary of External Factors	94
IX. Project Design Issues	99
1. Environmental and Social Impacts	99
2. The Issue of Ownership and Organicity of Interests	104
3. Security Implications	107
4. Bilateral Relations	110
4.1 Thailand and Malaysia	111
4.2 Singapore and Malaysia	111
4.3 Philippines and Malaysia	112
4.4 Brunei and Malaysia	113
4.5 Malaysia and Indonesia; Brunei and Indonesia	113
4.6 Indonesia and Thailand	113
4.7 Political Implications of Interconnections	114
5. Financing	115
5.1 Project Risks and Uncertainties	115
5.2 Country Debt Ceilings	121
6. Pricing of Electricity	123
7. Organizational Issues	127
X. Options of Electricity Trade	134
1. Scale Properties	134
2. Stages Reached by Existing Interconnections	141
3. Terminal Stage	141
XI. ASEAN Options and Scenarios	144
1. Individual Interconnection Projects	144
2. Future Options	146
2.1 Submarine HV Cable Joint Venture	146
2.2 Joint Sea Bed Survey Project	148
2.3 R&D Consortium	148
2.4 Natuna-Bakun Linkage	150
2.5 Medium-Term Export of Asahan Power	155

3. Remote Scenarios	156
4. Project Identity	157
XII. Summary and Conclusions	160
<i>Appendix</i> Agreement on ASEAN Energy Cooperation	165
<i>Glossary</i>	172
<i>Bibliography</i>	179
<i>Index</i>	196
<i>The Author</i>	209

List of Tables

III-1	Growth of Electricity versus Total Energy Consumption in ASEAN	24
VII-1	Non-Renewable Energy Resource Base in ASEAN	65
VII-2	Renewable Energy Resource Base in ASEAN	66
VII-3	Shifts in Generating Mix in ASEAN	67
VII-4	Characteristics of ASEAN Grids/Utilities	70
VIII-1	ASEAN Hydropower Potential	92
VIII-2	Summary of External Factors Affecting the Feasibility of an ASEAN Grid	96
X-1	Stages in Electricity Trade/Co-operation	136
X-2	Scale Properties of Stages of Electricity Trade and Co-operation	138

List of Figures

III-1	Relationships between Levels of Electricity Supply and Demand	14
III-2	Typical Weekday Load Curves of Thai and Malaysian Grids	15
III-3	NORDEL Regional Grid	19
III-4	Peak-Power Trading	21
V-1	Interrelationships among Energy Bodies in ASEAN	44
VI-1	Existing and Contemplated ASEAN Interconnections	62
VII-1	ASEAN National Grids	71
VIII-1	Location of Energy Resources and Demand Centres	95

Acknowledgements

The author must give thanks, first and foremost, to the Institute of Southeast Asian Studies which made this work possible through a Research Fellowship. The topic was suggested by Prof. K.S. Sandhu, the Director. He was most helpful in defining more precisely my research programme. The ASEAN grid, I discovered, is an interesting but neglected area of academic study.

The study of the ASEAN grid concept cannot be a purely library work — little or no academic material has been written on the topic. The author is therefore indebted to the materials generously provided by power and energy experts from ASEAN power utility companies. In this regard, special thanks are due to Dr Rozali Ali and Mr Tajudin Ariff of the National Electricity Board of Malaysia. Dr Rolf Langhammer of the Kiel Institute of World Economics kindly reviewed Chapter IX.

Source materials that cannot be found elsewhere and most valuable insights were provided by Mr Kong Ai Tiing of Sarawak Electricity Supply Corporation (SESCO), Mr Somkiet Phaloprakarn

and Mr Siridat Glankwahmdee of the Electricity Generating Authority of Thailand; Dr Ing Nengah Sudja and Dr Adhi Satriya of Perusahaan Umum Listrik Negara (PLN of Indonesia), as well as the chairman of the PLN, Dr Arismunandar; Dr Prida Wibulswas of the Asian Institute of Technology; Dr Filino Harahap, Dr S.K. Torok, and Mr Saha Pranesh Chandra of ESCAP-Bangkok; and Dr Higinio Ibarra and Engr Deogracias Peralta of the National Power Corporation (Philippines). Mr Paul-Frederik Bach and Max Pilegaard of Danish Power Consult generously provided information about NORDEL. Mr Rolf Wiedswang, chairman of NORDEL, gave permission for the use of NORDEL source materials. Others who helped the author are Dr Zuhail of Badan Pengkajian dan Penerapan Teknologi (BPPT in Indonesia), Mr Caesar Atienza of the ASEAN Secretariat (Jakarta), Mr Hartoyo Notodipuro and Soenarjo Sastrosewojo of the PLN Research Centre, Datin Hajjah Jusnani Haji Lawie of the Ministry of Finance (Brunei) and Awang Malai Ali of the Ministry of Development (Brunei), and Mr Choy Hon Tim of the Public Utilities Board (Singapore).

Finally the author thanks his wife, Vivien, for reviewing the manuscript, catching his grammatical lapses, and giving him moral support throughout the study.
