ADJUSTING
towards
AFTA

**The Dynamics of Trade
in ASEAN**

The **Institute of Southeast Asian Studies (ISEAS)** was established as an autonomous organization in 1968. It is a regional research centre for scholars and other specialists concerned with modern Southeast Asia, particularly the many-faceted problems of stability and security, economic development, and political and social change.

The Institute's research programmes are the Regional Economic Studies Programme (RES), Regional Strategic and Political Studies Programme (RSPP), Regional Social and Cultural Studies Programme (RSCS), and the Indochina Programme (ICP).

The Institute is governed by a twenty-two-member Board of Trustees comprising nominees from the Singapore Government, the National University of Singapore, the various Chambers of Commerce, and professional and civic organizations. A ten-man Executive Committee oversees day-to-day operations; it is chaired by the Director, the Institute's chief academic and administrative officer.

The **ASEAN Economic Research Unit**, within the RES, is an integral part of the Institute, coming under the overall supervision of the Director, who is also the Chairperson of its Management Committee. The Unit was formed in 1979 in response to the need to deepen understanding of economic change and political developments in ASEAN. A Regional Advisory Committee, consisting of a senior economist from each of the ASEAN countries, guides the work of the Unit.

List of Figures

4.1	The ASEAN Automobile “Factory”	71
A1	‘Switch’ and ‘No Switch’ $m_i - x_i$ Combinations when $M_i > X_i$	84
A2	‘Switch’ and ‘No Switch’ $m_i - x_i$ Combinations when $X_i > M_i$	85

Acknowledgements

This study was funded by an Institute of Southeast Asian Studies (ISEAS) Research Fellowship within the ASEAN Economic Research Unit (AERU). Most of the research was conducted during my stay at ISEAS from May to July 1994. I am particularly grateful to Joseph Tan, Co-ordinator of AERU, for his constant support and encouragement, and for valuable discussions. While at ISEAS, I benefited greatly from discussions with various staff, both permanent and visiting. I would like to thank Pearl Imada, Sree Kumar, Reza Siregar, Ng Chee Yuen, Mehdi Krongkaew, Anggito Abimanyu and Mya Than for sparing the time to assist me with my work. I also thank Toh Mun Heng and Jose Tongzon from the National University of Singapore, and Lam San Ling and Wong Fot Chyi from the Monetary Authority of Singapore for valuable discussions. I am also grateful to three anonymous referees for their detailed comments. Parts of this study were presented at seminars at ISEAS, National University of Singapore, Australian National University and Monash University. I am grateful to participants at these seminars for their comments.

Finally, I would like to thank Peter Dixon, Director of the Centre of Policy Studies and IMPACT Project at Monash University, for releasing me from normal duties to allow me time to complete this monograph on my return to Monash. Peter's role in this project extends beyond just this, however, as much of the methodology employed in this study draws upon earlier work done jointly with him.
