Energy, the Environment and the Oil Market

The **Institute of Southeast Asian Studies** (ISEAS) was established as an autonomous organization in 1968. It is a regional research centre for scholars and other specialists concerned with modern Southeast Asia, particularly the many-faceted problems of stability and security, economic development, and political and social change.

The Institute is governed by a twenty-two-member Board of Trustees comprising nominees from the Singapore Government, the National University of Singapore, the various Chambers of Commerce, and professional and civic organizations. A ten-man Executive Committee oversees day-to-day operations; it is chaired by the Director, the Institute's chief academic and administrative officer.

The **ASEAN Economic Research Unit** is an integral part of the Institute, coming under the overall supervision of the Director who is also the Chairperson of its Management Committee. The Unit was formed in 1979 in response to the need to deepen understanding of economic change and political developments in ASEAN. A Regional Advisory Committee, consisting of a senior economist from each of the ASEAN countries, guides the work of the Unit.

Acknowledgements

The original versions of three chapters (by Philip K. Verleger, John P. Ferriter, and Hugh E. Norton) of this book were first presented at the Seventh Asia-Pacific Petroleum Conference, 23–25 September 1991, Singapore, organized by Times Conferences, under the auspices of the Institute of Southeast Asian Studies and supported by the Singapore Economic Development Board, Singapore Trade Development Board, and the Port of Singapore Authority. Remaining chapters by Shankar Sharma, Urooj Malik, and Arnold B. Baker were written specially for this volume. We are most appreciative of the time and effort committed to the contribution and revision of the papers by the authors. We would also like to thank Graham Duxbury, Director, Petroleum Economics Limited, London for providing us the summary of their recent Energy and the Environment study which has been published as an appendix in the book.

Finally, we would like to acknowledge co-operation of the institutions to which the contributors are affiliated.
