

“This collection provides a powerful and sophisticated analysis of how environmental movements influence politics in Asia, and how politics influences movements. It effectively comes to grips with the diversity of cases and regimes, and should be essential reading for all those who care about how growing environmental stresses and challenges are confronted in Asia.”

John S. Dryzek
Centenary Professor, University of Canberra

“Interest in the environment never recedes; it is just reworked for a new era. This important book reflects the challenges and questions currently foremost in scholars’, activists’ and policy-makers’ minds—the Anthropocene, environmental justice, China’s Belt and Road Initiative, and post-politics—all addressed through the lens of environmental movements in Asia.”

Jonathan Rigg
*Professor at the School of Geographical Sciences,
University of Bristol*

“How have authoritarianism, democratization and political change affected environmentalism in East and Southeast Asia? How have environmental mobilization and demands for environmental justice at the grassroots influenced politics there? What are the implications for the region’s rampant environmental degradation, incessant resource extraction and burgeoning contribution to global pollution? These are among the vital questions answered by this insightful and well-crafted volume. It will be a valuable resource for researchers, students, activists and policymakers.”

Paul G. Harris
*Chair Professor of Global and Environmental Studies,
Education University of Hong Kong*

“The anthropocene is not only about how humans have become the dominant influence in shaping our planet. It is also about the extent to which the environment has captured the imagination of our species and served to rework our societies and politics. This book shows convincingly that the concept is as relevant in Asia as anywhere. The editors’ overall introductory argument and the impressive collection of finely nuanced country case studies make an important contribution to our understanding of environmental movements in East and Southeast Asia, both in their own right and as embedded in the wider politics of the countries in question.”

Philip Hirsch
*Emeritus Professor of Human Geography,
University of Sydney*

“Despite its claims to universality, the Anthropocene concept remains largely a Western phenomenon. Yet the importance of Asia for the Anthropocene can hardly be overstated. This book is crucial in correcting this view by putting environmental movements in Asia center stage. Taking into account the diversity of the political, economic and social situations of Asian countries, it offers a differentiated overview of the landscape of ecological problems in the region. Finding solutions to the global ecological crisis will hinge, in large part, on Asia.”

Eva Horn
*Professor of Literature and Cultural History,
University of Vienna*

The ISEAS – Yusof Ishak Institute (formerly Institute of Southeast Asian Studies) is an autonomous organization established in 1968. It is a regional centre dedicated to the study of socio-political, security, and economic trends and developments in Southeast Asia and its wider geostrategic and economic environment. The Institute's research programmes are grouped under Regional Economic Studies (RES), Regional Strategic and Political Studies (RSPS), and Regional Social and Cultural Studies (RSCS). The Institute is also home to the ASEAN Studies Centre (ASC), the Singapore APEC Study Centre, and the Temasek History Research Centre (THRC).

ISEAS Publishing, an established academic press, has issued more than 2,000 books and journals. It is the largest scholarly publisher of research about Southeast Asia from within the region. ISEAS Publishing works with many other academic and trade publishers and distributors to disseminate important research and analyses from and about Southeast Asia to the rest of the world.

4.2:	Macaques feeding by the roadside in the western part of Singapore, 2012	126
4.3:	Students, monks, and environmental activists gather hand in hand with the local community, in chest-high water to bless and protect the mangrove forests at Lovers’ Island (Kaoh Bang កោះបង and Kaoh Aun កោះអ៊ូន) from sand-dredging in Koh Kong Province, Southwest Cambodia	129

4.4:	Phalla Vy stands before mountains of sand piled at a storage facility in Singapore, discovering for the first time what happened to the sand that was dredged up and seized from her homeland of Koh Sralau, Koh Kong Province, Southwestern Cambodia	129
5.1:	Catholic nuns participating in the march for climate justice in Manila, November 2015	153
7.1–7.2:	A protest against Lynas supported by many civil society organizations, notably Himpunan Hijau, Bersih, and Indigenous groups at Gebeng, in the state of Pahang, 24 June 2012	220
8.1:	Triangulated dynamism between the government, NGOs, and citizens	236
8.2:	Thai police officers captured university students and activists during their protest against the construction of the Mae Wong Dam at Kasetsart University, Bangkok, 18 November 2014	252
9.1:	A protest near the entrance of Formosa Ha Tinh Steel, Ký Anh, 4 October 2016	285
9.2:	Fishermen on the beach near Formosa Ha Tinh Steel, Ký Anh, 4 February 2018	286
10.1:	The venerable But Buntenh leads a group of monks from the Independent Monk Network for Social Justice as they travel from the capital city of Phnom Penh to support the people of Areng Valley in their protest against the construction of a hydroelectric dam in Southwestern Cambodia	319
10.2:	But Buntenh and his fellow monks from the Network for Social Justice perform a tree ordination ceremony as part of the effort to prevent the construction of the Areng Valley hydroelectric dam in Southwestern Cambodia	319

ACKNOWLEDGEMENTS

This book follows on the publication twenty years ago of another collective book, *Asia's Environmental Movements: Comparative Perspectives*, edited by Yok-shiu Lee and Alvin Y. So, which included the contribution of Hsin-Huang Michael Hsiao. As the twentieth anniversary of that publication was approaching, Hsiao invited Paul Jobin and Ming-sho Ho to work on a project for a collective update that would focus on how environmental movements have changed in the region during the first two decades of the twenty-first century.

A conference launched in December 2017 at the Institute of Sociology (IOS), Academia Sinica (in Taipei), and sponsored by the Asian Social Transformation Thematic Research Team, opened the discussion with presenters from Taiwan and Hong Kong (Paul Jobin, Alvin Y. So, James K. Wong, and Stephan Ortmann), and Southeast Asia (Francisco A. Magno, Fadzilah Majid Cooke, Jakkrit Sangkhamanee, and Suharko Suharko). We were fortunate to have stimulating feedback from Kuei-Tien Chou, Wen-Ling Tu, Hong-Zen Wang, Hua-Mei Chiu, Pin-Hsien Wu, Li-Hsuan Cheng, Mei-Fang Fan, Thung-Hung Lin, Mau-Kuei Chang, and Fu-Chang Wang. Unfortunately, despite his enthusiasm for this conference, our colleague Chun-Jie Chi, who was among the first scholars to introduce the environmental justice paradigm in Taiwan, was ultimately unable to join us as he was fighting a cancer that took his life a few months later. His spirit has nevertheless remained a source of inspiration for this book.

Transforming this conference into a book has been another exciting endeavour. In addition to the participants, who all agreed to take part in this collective volume, we were pleased to receive the contribution of Harvey Neo, James W.Y. Wang, and Adnan A. Hezri for additional chapters.

From the manuscript's early versions to its final submission, help was provided by Rebecca Fite in the form of editing and proofreading; her mix of rigour and enthusiasm was a great boost.

At the Institute of Sociology of Academia Sinica, we are indebted to Director Gwo-Shyong Shieh for his constant support and encouragement, as well as to our colleagues of the thematic research team on Asian Social Transformation in Comparative Perspective (Mau-kuei Chang, Jieh-min Wu, Fei-Yu Hsie, Ting-Hong Wong, Fu-chang Wang, Hong-zen Wang, Yen-Fen Tseng, and Alan H. Yang). And we must not forget our assistants Amanda Koh, Sherry Peng, Chi Wei Ying, Gordon Shih-hao Jheng, and Lulu Chen, without whom important tasks would not have gotten done, both for the conference and the book.

At ISEAS – Yusof Ishak Institute, Ng Kok Kiong's kind patience and support was another motivation to believe in this project. Catherine Ang and Sheryl Sin shepherded the manuscript through to book form.

We are, moreover, very grateful to two anonymous reviewers whose critical remarks and suggestions greatly helped to improve the final manuscript.

Thanks are due also to Wen-Tsen Lo for her beautiful design of the book cover, as well as documentary filmmakers Chin-yuan Ke and Kalyanee Mam for their magnificent photos. The photos provided by Kalyanee Mam, which also appear in the chapters on Singapore and Cambodia, capture our efforts to bring grassroots movements to the heart of the challenges of the Anthropocene across different Asian countries.

ABOUT THE CONTRIBUTORS

Adnan A. HEZRI is a Fellow of the Academy of Sciences Malaysia and the Chief Executive Officer of the Langkawi Development Authority, Malaysia.

Ming-sho HO is a Professor in the Department of Sociology, National Taiwan University, and Director of the Research Institute for the Humanities and Social Sciences, Ministry of Science and Technology (Taiwan).

Hsin-Huang Michael HSIAO is Chairman of the Taiwan-Asia Exchange Foundation, Chairman of the executive committee of the Center for Southeast Asian Studies, National Cheng-Chi University, and Chair Professor of Hakka Studies, National Central University. He is also Adjunct Research Fellow at the Institute of Sociology, Academia Sinica and Professor of Sociology at the National Sun Yat-Sen University.

Paul JOBIN is Associate Research Fellow and convener of the Asian Social Transformation Thematic Research Team at the Institute of Sociology, Academia Sinica, Taiwan.

Francisco A. MAGNO is Associate Professor in the Department of Political Science, and Founding Director of the Jesse M. Robredo Institute of Governance, at De La Salle University, Manila.

Fadzilah MAJID COOKE is a Research Associate at the Institute of Tropical Biodiversity and Sustainable Development, Universiti Malaysia Terengganu, and a Member of the International Steering Committee for Sustainability Initiative in the Marginal Seas in South and East Asia.

Harvey NEO is Senior Fellow and Head of Programme, Lee Kuan Yew Centre for Innovative Cities, Singapore University of Technology and Design.

Stephan ORTMANN is Adjunct Assistant Professor at the Centre for China Studies, Chinese University of Hong Kong.

Jakkrit SANGKHAMANEE is Associate Professor in the Faculty of Political Science, Chulalongkorn University in Bangkok, Thailand.

Alvin Y. SO is Professor Emeritus, Division of Social Science, Hong Kong University of Science and Technology.

Suharko SUHARKO is Associate Professor in the Department of Sociology at Universitas Gadjah Mada, Indonesia.

James W.Y. WANG is Assistant Professor, Department of Southeast Asian Studies, National Chi Nan University, Taiwan.

James K. WONG is Assistant Professor of Social Science Education, Division of Social Science and Division of Public Policy, Hong Kong University of Science and Technology.
