Information
Technology in
ASIA

The **Institute of Southeast Asian Studies (ISEAS)** was established as an autonomous organization in 1968. It is a regional research centre for scholars and other specialists concerned with modern Southeast Asia, particularly the many-faceted issues and challenges of stability and security, economic development, and political and social change.

The Institute's research programmes are Regional Economic Studies (RES, including ASEAN and APEC), Regional Strategic and Political Studies (RSPS), and Regional Social and Cultural Studies (RSCS).

The Institute is governed by a twenty-two-member Board of Trustees comprising nominees from the Singapore Government, the National University of Singapore, the various Chambers of Commerce, and professional and civic organizations. An Executive Committee oversees day-to-day operations; it is chaired by the Director, the Institute's chief academic and administrative officer.

2.2	Growth in IT Spending and Productivity	29
2.3	Payoffs from Non-IT Investments, in Asian and Non-Asian Countries	30
2.4	Payoffs from IT Investments, in Asian and Non-Asian Countries	30
2.5	Gap in Internet Readiness between Asian and Non-Asian Countries	33
2.6	PC Diffusion and GDP per Capita, in Asian and Non-Asian Countries	35
2.7	Information Services as Link between Production and Use	43
3.1	Conceptual Framework of the Information Economy	50
5.1	Human Capital, IT, Innovations, and per Capita Incomes: A Systemic Model	86
5.2	Primary School Enrolment in ASEAN, 1980 and 1996	89
5.3	Secondary School Enrolment in ASEAN, 1980 and 1996	90
5.4	Tertiary Education Enrolment in ASEAN, 1980 and 1996	91
5.5	Scientists and Engineers in R&D in ASEAN-5, 1985–95	94
5.6	Internet Penetration in ASEAN-5, 1998–2003	95

5.7	PC Penetration in ASEAN-5, 1998–2003	97
5.8	High-Tech Exports and Patents of ASEAN-5	103
5.9	Gross National Product and Personal Computers	104
6.1	Percentage of Users in Major Asian Economies Who Reported Ever Using the Internet to Make a Purchase	128
6.2	Impact of E-Commerce on a Product Basis, 2000–2005: Estimates of Online Shares	131
6.3	Rebuilding the Value Chain	134
7.1	The Productivity Cycle	149
7.2	Evolution of Singapore's IT Strategy	153
7.3	IT Infrastructure	154
7.4	IT2000: Singapore's Goals	156
7.5	Potential Benefits of e-ASEAN in Selective Areas	168
9.1	Corporatization Plan of the Telephone Organization of Thailand and the Communications Authority of Thailand	206
10.1	Number of Internet Hosts per 1,000 Persons in Asian Countries, 1999	218
10.2a	Charges for 20-Hour Dial-Up Internet Access in Asian Countries	221
10.2b	Monthly Charges for 64 Kps Internet Leased Line in Asian Countries	221
10.3	Tariff Revenues from Information Goods	224
10.4	An Assessment of the U.S.-Centric Proposals	234
11.1	GDP Structure by Economic Sectors: Southeast Asia, 1999	246
11.2	Growth of ICT in Vietnam	254
12.1	The Features of Knowledge and Their Implications	271
12.2	Taiwan's World Market Share in PC-Related Products	274
12.3	Geographical Distribution of IT Production by Taiwan-Based Firms	276
12.4	The Divergent Trend between Export Orders and Exports in Taiwan's IT Industry	277
13.1	Determinants of National Competitive Advantage	308
13.2	The Software Development Diamond	314

Acknowledgements

The Institute of Southeast Asian Studies, Singapore, would like to express its appreciation to the Konrad Adenauer Stiftung (KAS) for its generous financial support to the ASEAN Roundtable 2000 and this publication.

This volume would not have been possible without the collective efforts of the scholars and researchers who have exercised their intellectual capacities and carved out time from their undoubtedly crowded research agendas to serve as contributors. The editors of the volume thank them for all their input.

Contributors

Shin-Horng Chen was previously an associate researcher of the Industrial Technology Research Institute and is presently Director of the International Division at the Chung-Hua Institution for Economic Research, Taipei. His research interests include the areas of industrial economics, the economics of technological innovation and ICT, as well as studies on Taiwan with relation to the World Trade Organization and the Asia-Pacific Economic Co-operation, and his research can be found in journals such as *Research Policy* as well as in several edited volumes.

Jason Dedrick is Senior Research Fellow at the Center for Research on Information Technology and Organizations at the University of California, Irvine. His research interests include economic development, industrial policy, technology diffusion, and the globalization of the computer industry. His current work is focused on the international diffusion of computer production and use, as exemplified in his recent book *Asia's Computer Challenge: Threat or Opportunity for the U.S. and the World?* (1998), co-authored with Kenneth L. Kraemer.

Kenneth L. Kraemer teaches at the University of California, Irvine, where he holds the Taco Bell Professorship of IT for Management. He has conducted research on the management of computing in organizations for more than twenty-five years, and has co-authored nine books, including *Asia's Computer Challenge: Threat or Opportunity for the U.S.*

and the World? co-authored with Jason Dedrick, and *Managing Information Systems*.

Le Dang Doanh is President of the Central Institute for Economic Management, Vietnam, having also previously lectured at Hanoi University. In addition to serving as a member in various national boards and associations, he also maintains an active publication record, including, more recently, the book *Vietnam's Economy and the Impacts of the Crisis* (1998), with Suiwah Leung.

Jamus Jerome Lim was a Research Associate at the Institute of Southeast Asian Studies. His research interests are in the areas of information and communications technology, especially ICT policy, and international economics, which encompasses both international finance and trade issues. His recent research output includes "Singapore's SME & ICT Policies for the New Millennium", co-authored with Chia Siow Yue.

Meng-Chun Liu is an associate research fellow at the Chung-Hua Institution for Economic Research, Taipei. He is an active researcher in the areas of international trade, trade policies, and industrial organization, and his research work can be found both in journals such as the *Pacific Economic Review* and *Economic Record*, as well as conference volumes, an example being *Regionalism versus Multilateral Trade Arrangements* (1997).

Samuel V. Malvea is Senior Economist at the National Council for Applied Economic Research in New Delhi. He has worked in the areas of consumer demographics, monitoring and evaluation studies, and market research, in projects ranging from a national analysis of the promotion and structure of small-scale industries to the evaluation of biogas plants in India. He is currently involved in the comparative study of the development of information technology clusters in Bangalore and Singapore.

Sakulrat Montreevat is Fellow in the Regional Economic Studies programme of the Institute of Southeast Asian Studies, Singapore. Her research interests are in the areas of financial crises and their resolution

and consequences in Southeast Asia and macroeconomic management in Thailand. She has published “Impact of Foreign Entry on the Thai Banking Sector: Initial Stage of Bank Restructuring” in the ISEAS Working Paper series.

Aniceto C. Orbeta, Jr. is Senior Research Fellow at the Philippine Institute for Development Studies, a government think-tank. His research interests are in the fields of applied economic modelling, social sector issues, demographic economics, and electronic commerce, in particular, concepts and measurement issues in e-commerce. He has recently published *Population Growth and Economic Development in the Philippines: What Has Been the Experience and What Must Be Done* (1999).

Rajah Rasiah is Professor at the Institute for New Technologies, United Nations University, Maastricht, Netherlands. In addition to consultancy experience with various international and national bodies, he has a prolific publication record in the areas of industrial organization and relations, technology and development, and international finance, where he has recently co-edited a volume, *Industrial Technology Development in Malaysia: Firm and Industry Studies* (1999), with K.S. Jomo and Greg Felker.

Annette Amy Singh is a research analyst at the Centre for Entrepreneurship (formerly the Centre for Management of Innovation and Technopreneurship), based at the National University of Singapore. Her publications, which reflect her interests in technology policy, include joint work with Wong Poh-Kam on *The Role of Foreign MNCs in the Technological Development of Singaporean Industries* (2000).

Hadi Soesastro is Executive Director of the Centre for Strategic and International Studies, Indonesia, while concurrently holding lecturing appointments at the University of Indonesia, Jakarta, and Atmadjaja University, Yogyakarta. He has written extensively on energy issues, international trade, regional co-operation, the relationship between the economy and security, and the role of technology in development. He has recently co-edited a volume on *Domestic Adjustments to Globalization* (1998) with Charles E. Morrison.

Somkiat Tangkitvanich currently serves as Research Director for the Information Economy, Science, and Technology Development Program at the Thailand Development Research Institute. His research interests and publications include studies on the Internet and electronic commerce, and has recently published a research monograph on *Information Superhighway and Its Potential for Thailand's Development* (1997).

Toh Mun Heng teaches at the Department of Business Policy at the National University of Singapore, where he is also the Deputy Head. His varied research interests and publications are in the areas of econometric modelling, input-output analysis, international trade and investment, human resource development, household economics, and development strategies of emerging economies in the Asia-Pacific. His most recent research output is *Competitiveness of the Singapore Economy: A Strategic Perspective* (1998), co-edited with Tan Kong Yam.

Paramjit Singh Tyndall is Research Fellow at the Malaysia Institute of Economic Research (MIER), where he has been since 1992. His research interests have concentrated on industrial and technology policy, and the use of knowledge as a strategic tool for innovation and competitive advantage. In addition, he has also represented MIER in the steering committee for the *National K-Economy Master Plan*.

R. Venkatesan has been Principal Economist for Industry and Infrastructure at the National Council for Applied Economic Research in New Delhi since 1994, after successful appointments in both the private and government sectors. He has researched and published extensively in the areas of trade liberalization and the environment, policy competition for foreign direct investment, and the design of state-level industrial policies.

Wong Poh-Kam is both Director of the Centre for Entrepreneurship as well as Associate Professor in the Business School, National University of Singapore. He has consulted widely for organizations both in Singapore and abroad, and has published extensively in international journals such

as *International Business Review* and *International Journal of Technology Management*, on topics such as information and communications technology, the management of innovation, and national innovation systems in East Asia.
