THE ROLE OF GOVERNANCE IN ASIA

The Japan Institute of International Affairs (JIIA) is a private, non-profit, and independent research organization founded in 1959 through the initiative of former Prime Minister Shigeru Yoshida, the first president of the JIIA.

The JIIA's mission is to contribute to the formulation of Japan's foreign policy through organizing study groups on regional and global issues, international conferences, symposiums and seminars, and joint research projects with other domestic and overseas research organizations and universities. The JIIA also invites foreign researchers to Japan and assists them with their research activities, and it issues a wide range of publications as a result of these activities.

The **ASEAN Foundation** was established by ASEAN leaders in 1997 to boost ASEAN's effort to promote regional co-operation in various fields of social and human development such as science and technology, youth, women, health and nutrition, education, labour affairs, disaster management, HIV/AIDS prevention and control, children, population, and rural development and poverty eradication, culture and information, environment, drug matters, and civil service. The Foundation was established to promote greater awareness of ASEAN, greater interaction among the peoples of ASEAN as well as their wider participation in ASEAN activities.

The ASEAN Foundation deems that the most beneficial and effective means to attain its objectives is focusing on human resources development projects such as education, training, seminars, workshops, exchanges, network-building, fellowships and information dissemination.

The **Institute of Southeast Asian Studies (ISEAS)** was established as an autonomous organization in 1968. It is a regional centre dedicated to the study of socio-political, security and economic trends and developments in Southeast Asia and its wider geostrategic and economic environment.

The Institute's research programmes are the Regional Economic Studies (RES, including ASEAN and APEC), Regional Strategic and Political Studies (RSPS), and Regional Social and Cultural Studies (RSCS).

ISEAS Publications, an established academic press, has issued more than 1,000 books and journals. It is the largest scholarly publisher of research about Southeast Asia from within the region. ISEAS Publications works with many other academic and trade publishers and distributors to disseminate important research and analyses from and about Southeast Asia to the rest of the world.

Jorge V. TIGNO is Assistant Professor at the Department of Political Science, University of the Philippines

Acknowledgements

The three volumes bring together essays from a two-year research project, “Asian Development Experience” that commenced in November 2001. The principal objective of the project was to investigate the dynamic factors contributing to the remarkable success of ASEAN economies. We particularly focused on the role of external factors, domestic policy reforms and governance as well as regional co-operation, which have received lesser attention in the past literature of the field.

We would like to thank Saori Honma and Katsuya Ohara of the Japan Institute of International Affairs for their dedication to this research project and the contributors to the volumes for making the editors’ job so easy. We would also like to acknowledge the tireless support of Triena Ong and Dayaneetha De Silva of the Institute of Southeast Asian Studies for realizing the publication.

The research project was undertaken with the financial support of the Japan-ASEAN Solidarity Fund, contributed by the Japanese Government and managed by the ASEAN Foundation.
